Universal Roof & Contracting

It is the vision of Universal Roof & Contracting to make a real difference in the lives of the people with whom they come into contact each and every day. For over twenty years, they have served Florida businesses and home owners with this in mind. In 2013, their Community Works division was established so they could expand their reach throughout the community.

As a growing company with offices in Orlando, Tampa and Jacksonville, Universal Roof and its employees often assemble at volunteer work days, food and clothing drives, and area events to offer support and increase awareness for local, national and international organizations. Their generosity and enthusiasm is obvious as they enjoy facilitating games for kids,

walking 5 K causes or sponsoring fundraising events. Projects in 2016 include assembly of US Army Care Packages, two Cannonball Kids' Cancer fundraisers, Community Blood Drive, and "Raising the Walls" at Habitat for Humanity's Butler Preserve where over 20 Universal associates helped build a home for a local family. This August, Universal Associates partnered with the Central Florida Slug Club to "Grow a Library" for the Pine Hills branch of the United Cerebral Palsy Charter School. Raising donations for furniture, painting supplies, and textiles, the group painted murals and assembled desks, tables and chairs to create an imaginative library environment for kids with disabilities.

Other Community Works programs include support for the International Justice Mission, Cornerstone Charter Academy Golf Tournament, True Life Choice building renovation and "Christmas Child" toy drive.
